Driving License: SAUDI ARABIA | **Nationality:** INDIAN

Immediate Joining - Transferable Iqama with NOC

PROFESSIONAL SUMMARY

Results-driven IT Network Engineer | Technical Support Engineer | IT Specialist with 3+ years of experience supporting enterprise IT infrastructure, network operations, and end-user computing environments. Experienced in installing, configuring, troubleshooting, and maintaining LAN/WAN, Wi-Fi, VPN, TCP/IP, DNS, DHCP, VLANs, Cisco routers and switches, Windows Server, Active Directory, Microsoft 365, and Windows operating systems. Proven ability to provide Level 1/Level 2 technical support, resolve complex hardware, software, and network incidents, and consistently achieve SLA targets in fast-paced business environments. Skilled in network monitoring, ITSM ticketing systems, system administration, cloud technologies (AWS & Microsoft Azure), endpoint security, and infrastructure maintenance. Strong problem-solving, communication, and customer service skills with a commitment to delivering reliable, secure, and high-performing IT services.

CORE COMPETENCIES

- Network Administration & Infrastructure Support
- LAN, WAN, Wi-Fi & VPN Management
- Cisco Routing & Switching
- TCP/IP, DNS, DHCP & VLAN Administration
- Windows Server & Active Directory
- Microsoft 365 Administration
- Desktop, Laptop & End-User Support
- Hardware & Peripheral Troubleshooting
- Level 1 & Level 2 Technical Support
- Network Security & Firewall Support
- AWS & Microsoft Azure Fundamentals
- IT Incident Management & SLA Compliance

KEY ACHIEVEMENTS

- Successfully resolved 500+ network, hardware, and software incidents while consistently meeting SLA targets, ensuring minimal disruption to business operations.
- Supported the installation, configuration, and maintenance of LAN/WAN, Wi-Fi, Cisco routers, switches, and Windows Server environments, contributing to stable and secure network infrastructure.
- Improved end-user productivity by delivering Level 1/Level 2 technical support, reducing average incident resolution time through effective troubleshooting and root cause analysis.
- Assisted in the deployment of Microsoft 365 services, Active Directory user management, and endpoint device configuration, ensuring secure user access and streamlined onboarding/offboarding processes.
- Collaborated with cross-functional teams, ISPs, and vendors during infrastructure upgrades, preventive maintenance, and network implementation projects, contributing to improved network reliability and operational efficiency.

PROFESSIONAL EDUCATION & CERTIFICATIONS

- **Bachelor of Engineering in Computer Science:** Visvesvaraya Technological University
- **Diploma in Computer in Science:** GOK, Department of Technology
- **Cisco Certified Network Associate (CCNA)**
- **CompTIA Network +**
- **DevOps + AWA** – Certificate ID: BTM-JSP-24-165

SYSTEMS & TOOLS

- Linux, VMware, Windows 10 & 11
- Amazon Web Services (AWS), PuTTY, Any Desk, Remote Desktop (RDP)
- Ipconfig, Outlook, One drive, Microsoft Office Suite
- Jira, Microsoft Defender, Windows Firewall

PROFESSIONAL EXPERIENCE

Company: **EG& G MIDDLE EAST COMPANY, Saudi Arabia**
Position: Network Engineer (September 2024 to May2026)

Company: **RAKUTEN COMPANY, India**
Position: Network Administrator (June 2023 to August 2024)

DUTIES & RESPONSIBILITIES

- Installed, configured, and maintained enterprise LAN, WAN, Wi-Fi, VPN, and TCP/IP network infrastructure to ensure high availability and business continuity.
- Configured, monitored, and troubleshoot Cisco routers, Layer 2/Layer 3 switches, wireless access points, and network security devices.
- Installed, relocated, and maintained network equipment including switches, routers, structured cabling, racks, wireless controllers, and access points.
- Supported cloud networking environments using AWS and Microsoft Azure, including VPCs, virtual networks, subnets, security groups, and hybrid connectivity.
- Administered Windows Server environments, Active Directory, DNS, DHCP, Group Policy, and user account management.
- Managed Microsoft 365 services including Outlook, Teams, OneDrive, Exchange Online, and Office applications while supporting end-user productivity.
- Configured user accounts, password policies, permissions, and access control using Active Directory and Microsoft 365 administration.
- Supported employee onboarding and offboarding by provisioning user accounts, configuring systems, deploying hardware, and enforcing IT security policies.
- Installed, configured, upgraded, and maintained Windows operating systems, business applications, antivirus solutions, and endpoint security software.
- Diagnosed and resolved complex network connectivity issues involving DNS, DHCP, VLANs, IP addressing, routing, switching, and VPN technologies.
- Delivered Level 2 technical support for desktops, laptops, printers, IP phones, mobile devices, meeting room systems, and peripheral equipment.
- Delivered remote and onsite technical support using secure remote administration tools while maintaining high customer satisfaction.
- Monitored network performance, system availability, bandwidth utilization, and infrastructure health using network monitoring tools.
- Performed preventive maintenance, firmware upgrades, operating system patching, and security updates for servers, network devices, and client systems.
- Performed root cause analysis on recurring infrastructure incidents and implemented preventive solutions to improve service reliability.
- Maintained accurate documentation including network topology diagrams, IP addressing schemes, asset inventories, SOPs, and technical knowledge base articles.

I hereby declare that the information furnished above is true to the best of my knowledge.
